For and on behalf of Subcontractor -Name of the Subcontractor:  
OMAN DRILLING & SOIL TECHNOLOGY CO.LLC**Attachments:**ANNEXURE A1\_Special Conditions  
ANNEXURE A2\_HSE & Quality Requirements

## ANNEXURE A1

**SPECIAL CONDITIONS:**

1. Job shall be strictly as per project requirements and to the entire satisfaction of client/consultant.
2. The borehole reinstatement must be done by the Subcontractor according to the standard practice or based on the project specification, as per the project requirements.
3. The Subcontractor shall not act upon any unconfirmed order or instruction or decision having commercial implication received by them directly, other than those confirmed and notified in writing by the Subcontract Unit of Galfar. If the Subcontractor receives such direct order or instruction, they shall forthwith inform and obtain written confirmation from the Subcontracts Unit of Galfar. Under no circumstances shall the Subcontractor execute work without proper Subcontract Work Order covering the scope of work
4. The word "Lumpsum" means Subcontractor has to complete the entire scope of work as per the terms and conditions of the Subcontract Work Order and no variation is applicable.
5. Third party insurance is covered by the Contractor's All Risk (CAR) policy of the Main Contract. However, the subcontractor at their own cost shall provide insurance required for their personnel, vehicles and equipments.
6. Diesel for Subcontractor's equipment at site shall be provided by Galfar on chargeable basis at market rate +15 % handling charge.
7. Subcontractor shall strictly follow the HSE requirements of Galfar / ROP.
8. Subcontractor shall conform to the applicable laws, rules and regulations of Sultanate of Oman in particular with regards to employment, security, health, access to sites and other social or labour obligations for the execution of their obligation under the subcontract work order.
9. The Subcontractor shall arrange at their own expense for any insurance required by law and Subcontractor shall arrange at their expense for safety training required for their personnel.
10. The cost of facilities provided by Galfar, if any, other than mentioned in the Subcontract work order, shall be back charged from the Subcontractor based on the prevailing rates.

11. All the employed labour from Subcontractor should possess valid resident card issued by Government of Sultanate of Oman. The Subcontractor should submit copies of resident card and visa of labours to our Project Manager for verification before deploying them on the job. Labours whose sponsor is other than (M/s. Oman Drilling & Soil Technology Co. LLC.) is not allowed to work in this project.
12. Subcontractor shall submit their invoices at Galfar HO along with site certified measurement sheets signed by Galfar site in charge.
13. Subcontractor has to mobilize the crew to site on confirmation from our Project Manager and has to complete the entire scope of work within the agreed time frame and as per the project requirement.
14. You shall submit the copy of resident card and medical certificates of the proposed crew to our HSE Manager and HR Manager and obtain prior approval before mobilizing to site.
15. Company name in resident card of Subcontractor's labours shall match with the original company name. Subcontractor shall submit these documents to our Project Manager and get approval before mobilizing their crew to site.
16. The Subcontractor shall submit the details of vehicles/equipments and proposed crew to our Project Manager/Construction Manager and obtain the prior approval, before mobilizing to site.

#### Deliverables

Comprehensive report must be submitted in the format prescribed in the specification and shall include the following:

1. Factual description of the works, borehole logs, site plan and results of laboratory test.
2. Engineering analysis of the sub-surface conditions
3. Detailed recommendations regarding suitable foundations, allowable bearing capacities, expected settlements, pile load capacities, excavation requirements, lateral pressures, engineering of fill, excavatability/rippability assessment and concrete protection.
